4	Matthias	Kettemann	University of Frankfurt, Germany/University of Graz, Austria	Academia	Austria	Germany	Human rights		Legal and policy framework for Internet intermediaries	EuroDIG		Member of an org team	Intermediaries are key to our experience of the Internet. They have an essential structural role in enabling the exercise of human rights on the Internet. But they can also interfere with human rights on their own volition or be coerced by states do act as quasi-police. Recent judgements have not provided definitive answers as to their liability/responsibility for user content. Efforts to combat hate speech have led to semi-voluntary commitments that need to be critically reviewed. The clash of different legal systems and jurisdictions has started. At the Council of Europe, a Recommendation on Internet Intermediaries is in the works. Further discussions are needed. These are issues EuroDIG should tackle.
7	MIGUEL	PERES SUBIAS	AUI - INTERNET USERS ASSOCIATION	Civil society	Spain	Spain	Human rights		MyData an opportunity to innovate on privacy	EuroDIG		Member of an org team	More and more products and services that arise around customization and exploitation of personal data, on the other hand more and more citizens begin to worry about the impact that new technologies have in their private life while regulators are struggling to address the new challenges in this area and that threaten the right to privacy for citizens There are a global movement for ownership of the personal data of each of us is the individual against the current model in which the data owner is the company that collects. This movement known as MyData opens a range of opportunities for innovation in tools, products, services and standards to make this change of model and in 2017 we will see a big boost in this direction since the new European directive and betting big companies in this matter will put this topical subject.
15	Niamh	Ni Chiara	University College Cork	Academia	Ireland	Ireland	Human rights		We are living in an age where more and more of our lives are documented online. From the time we first set up our facebook our lives are documented in one way or another. For certain areas of law, data protection exists. If a lawyer has confidential infor	EuroDIG		Member of an org team	
22	Jutta	Croll	Digital Opportunities Foundation	Civil society	Germany	Germany	Human rights		The UN Convention on the Rights of the Child in a digital environment	EuroDIG		Member of an org team	Children's rights were enshrined in the UN-CRC when the Internet was'n there. Now children grow up in a digitalized environment where it is necessary to ensure their rights are still taken into account and brought into force and where children are empowered to claim their rights for themselves.
30	Alison	Harcourt	University of Exeter	Academia	UK	UK	Human rights		decision-making in internet governance standards	EuroDIG	Eurodig proposal: I plan to cover an issue based upon the ESRC funded research project, International Professional Fora (http://www.internetpolycystre.ams.com/) together with my project partners, Professor George Christou (University of Warwick), Dr Imir Rashid (University of Exeter) and Professor Seamus Simpson (University of Salford). The issue will be themed focussing	Member of an org team	We are funded by the ESRC.
33	Frederic	Donck	Internet Society	Technical community	Belgium	Belgium	Human rights		CENSORSHIP AND SURVEILLANCE	Both	INTERNET SOCIETY COMMUNITY (Members, chapters, staff)	Member of an org team	Issue aims at addressing increase in censorship, explore the "why", how it does affect trust

47	Gonzalo	Lopez-Barajas	Telefónica, S.A.	Private sector	Spain	Spain	Human rights		Are we aware how our personal data is used? How can we build consciousness on the issue?	EuroDIG		Member of an org team	The accelerated growth of the internet has outpaced our abilities as individuals, societies and states to maintain control of our identity and privacy. We need rises awareness of current practices in the area of personal data online, empower individual users and giving them control of their personal data: what personal data organisations and governments hold, how it is used, what are the users' access rights? As our lives are becoming fully Digital, there are all relevant issues everyone should be knowledgeable. But how can this be achieved?
65	Fotjon	Kosta	Focal Point Albanian IGF (in-formation)	Government	Albania	Albania	Human rights		Cybersecurity versus human rights: how we can safe both of them? 2. 89	Rainer	Rodewald	Bündnis Privatsphäre Leipzig e. V. (Alliance Privacy Leipzig, registered association)	Civil society	Germany	Germany	Human rights		Beyond data protection – Convention of Data Usage	EuroDIG		Member of an org team	Data protection is based essentially on the knowledge and the consent of a person whose data shall be collected and processed. With IoT and sensors in smart devices used for example in SmartCities, SmartHomes or Health Care products data will be collected and processed without even the knowledge of the person affected by it. This results in the necessity to ask for the responsibility of the entities who wants to collect and process data and probably to find principles to regulate their usage. Following the example of the process that shaped the Human Rights Convention and building on its universal values developing a Convention of Data Usage could be a way to discuss and in the end settle this issue.

90	Rainer	Rodewald	Bündnis Privatsphäre Leipzig e. V. (Alliance Privacy Leipzig, registered association)	Civil society	Germany	Germany	Human rights		Self Determinated Living In SmartCities	EuroDIG		Member of an org team	How can individual self determination and alternative ways of living fit together with concepts and realisations of "SmartCity" where omnipresent sensors will be connected to exploiting and decision making algorithms that are tuned up to efficiency? What are the challenges for our right of privacy? What kind of risks have to be considered regarding the areas of conflict of data driven capitalist exploitation logics, integrated and fully connected urban areas and data driven social sorting based on the everydayness introduced by smart city concepts for citizens quality of life? What are we facing in the long run? Are there alternatives? Do we need a right of "not to be measured"?
98	valentina	pellizzer	one world platform	Civil society	Italy	Bosnia and Herzegovina	Human rights		Internet of Things	Both		Member of an org team	IoT is everywhere while citizens/consumers/users awareness, rights are behind struggling take in and understand the implication of personal data managements, privacy and safety smart cities managed by technocrats do not reflect a divers citizenships of genders, native and migrants, access and economic power
101	Wolfgang	Kleinwächter	University of Aarhus	Academia	Germany	Germany	Human rights		Human Rights in the Digital Ege	EuroDIG		Member of an org team	Human Rights in the digital age will remain a key issues in the coming years. This will go beyond privacy and freedom of expression, which has dominated the discussions in the previous years. If we move into a "digital society" we have to enhance our understanding of the existing individual rights into a new social-economic context and whether there is a need to create "new rights". The NetMundial Declaration, which defines Internet Governance principles, is based on Human Rights as the key principle. The UN Human Rights Council has recognized that individuals have the some himan rights offline and online. However there is a need to get a more precise picture what this means in practice in the borderless cyberspace. There are a number of initiatives like from Italy or the Marci Civil for Barzil which has touched this issues. Recently, a high level multistakeholder group of German experts under the leadership of the former president of the European Parliament, Martin Schulz, has drafted a document on Human Rights in the Digital Age which was presented to the LIBE Committee of the European Parliament in December 2016. The proposal was also presented at the 11th IGF in Guadalajara. The proposal is to bring this issue into the broader context of EURODIG, proabbaly within one of the plenary sessions.

27	Paul	Fehlinger	Internet & Jurisdiction	Other	Germany	France	Development of IG ecosystem		Jurisdiction: More legal interoperability, or a less global Internet	EuroDIG		Member of an org team	Summary of the first Global Internet and Jurisdiction Conference, including a roadmap for enhanced multistakeholder cooperation: http://www.internetjurisdiction.net/uploads/pdfs/GIJC-Secretariat-Summary.pdf
29	Anja	Gengo	IGF	Intergovernmental Organization	Bosnia and Herzgovina	Switzerland	Development of IG ecosystem		ROLE OF NATIONAL, REGIONAL, SUB-REGIONAL AND YOUTH IGFs (need for stakeholder engagement)	Both		Member of an org team	
44	Menno	Ettema	Council of Europe - No Hate Speech Movement	Intergovernmental Organization	Netherlands	France	Development of IG ecosystem		Youth participation in Internet Governance, because it's their right and future, and the future of the Internet.	EuroDIG		Member of an org team	The Convention on the Rights of the Child stipulates that decisions concerning them should seek to involve them. Because children and youth are a major group of users of platforms, apps and connected things, including toys (Internet of Things), they must be a partner in Internet Governance. Many are also minors, therefore children rights and safety concerns need to be considered and internet media literacy education is essential. The recommendations from the seminar 'Youth Participation in Internet Governance' held with young people in the spring of 2017 by the Youth Department of the Council of Europe is a good starting point to work towards full youth participation in Internet Governance

17	Daniel	Waugh	Union of Students in Ireland (USI)	Civil society	Ireland	Ireland	Access and literacy		Open Data	Both		Member of an org team	The use of Open Data and Open Government Data for civil society in developing public policy for economic and social development. The issue of training and knowledge of open data and how to use it and empowering civil groups to demand more open data from their government in order to advise and campaign on issues.
24	Anna	Orlova	State University of Sao Paulo(UNESP)/Cooperation and Development Eastern Europe	Academia	Russia	Brazil	Access and literacy		community connectivity developed by and for community networks in rural and isolated areas	Both	Roger Baig Viñas (guffi.net community network), secretary of ISOC-CAT association Guido Iribarren , (AlterMundi/ARG), AlterMundi community network model	Reporter	Often stakeholder of EuroDIG and SEEDIG wear a few hats at the same time, therefore it seems reasonable that in the stakeholder section one could tick a few categories. At the moment it is only one category.
28	Stuart	Hamilton	International Federation of Library Associations and Institutions (IFLA)	Civil society	UK	Netherlands	Access and literacy		Community connectivity: how to bring together engineers, activists, tech folk and librarians to connect anchor institutions in the community to the Internet and provide access and skills training.	EuroDIG		Member of an org team	This topic (and a pilot project) is already being discussed in a working group of IFLA, the Institute of Electrical and Electronics Engineers (IEEE), ISOC, Electronic Information for Libraries (EIFL) Gigabit Libraries Network, the IGF Dynamic Coalition on Community Connectivity (DC3), People Centred Internet, Microsoft and the US and Tunisia governments. It was discussed extensively at the IGF 2016 in Mexico, and DC3 and the Dynamic Coalition on Public Access in Libraries are planning 2017 work in this area. In the European context, the recent broadband infrastructure project launched by the European Commission and European Investment Bank could be interesting to address in the discussion.
31	Luca	Belli	Center for Technology & Society at FGV	Academia	Italy	Brazil	Access and literacy		Community Connectivity	EuroDIG		Member of an org team	According to ITU figures, 4 billion people are still unconnected to the Internet. Digital divides are particularly sharp with regard to rural communities and low-income populations. Alternative strategies need to be discussed to allow the remaining 4 billion to enjoy the benefits of connectivity. Community connectivity has proved to be a feasible to let the unconnect build their own connectivity in a sustainable fashion. Community connectivity should be considered as a core issue to be discussed at EuroDIG. More info on the matter can be found consulting the Report of the IGF Dynamic Coalition on Community Connectivity http://internet-governance.fgv.br/sites/internet-governance.fgv.br/files/publicacoes/community_connectivity_-_building_the_internet_from_scratch_0.pdf

77	Marianne	Franklin	Goldsmiths University of London/Internet Rights and Principles Coalition	Civil society	New Zealand	UK	Access and literacy	Human rights	Enabling Refugees and Newcomers to become digital citizens	EuroDIG		Member of an org team	This issue develops action points from two workshops on human rights for refugees and migrants at the 2016 EuroDIG meeting. International law states that human rights belong to all. Recognition of human rights for the online environment also applies to all, including refugees. If access to internet goods and services are integral to being a citizen in the 21st century then how to ensure that newcomers, and those forced to flee their homes, are able to enjoy the same levels of access and thereby opportunities to be digital citizens as well? How can governments and the private sector support access, digital literacy and privacy awareness for disadvantaged populations, new residents, and thereby counteract the effects of socioeconomic marginalization and forms of digital disadvantage?

45	Christian	Borggreen	CCIA Europe	Private sector	Denmark	Belgium	Security and crime		Improving criminal justice in cyberspace	EuroDIG		Member of an org team	States' jurisdiction, traditionally anchored on the principle of territoriality, is increasingly challenged as cyberspace is in principle borderless. Notably, law enforcement agencies' access to criminal evidence is increasingly complicated by its storage online, often by private companies' servers, and often abroad in another jurisdiction. This sense of lawlessness in cyberspace complicates law enforcement's ability to rapidly secure and obtain digital evidence to prevent and investigate serious crime and terrorism.

An exchange of views among WTO member countries mapped the trade-related aspects of e-commerce that would fall under the remit of the WTO, and included issues such as: network neutrality, data localisation, interoperability and encryption. Member states seem to be divided between those that express readiness to start delineating outcomes from the discussions on e-commerce and those that believe it is too early to draw any conclusions. Among the latter are many developing countries who see e-commerce as a new issue, not included in the priorities set by Doha. According to them, access to infrastructure and e-literacy skills – which would allow developing countries to make e-commerce flourish – need to be discussed before the development of multilateral frameworks. Views are also split on how to proceed with the moratorium on customs duties. While some want to see it become permanent, others believe that a mechanism of temporary extension is more adequate. One thing seems to be gaining consensus among member states, however: e-commerce is gaining importance and will probably be among the key topics of the WTO Ministerial Meeting in 2017 (MC11).
